abhaygmoudhgal@gmail.com | +91 90362 14150 | [LinkedIn](#)

Highly motivated and detail-oriented AI enthusiast with a strong foundation in machine learning and software development, driven to build intelligent, scalable, and impactful solutions.

EDUCATION

PES University, Bengaluru — **M.Tech**, Computer Science & Engineering (2025 – 2027) | **CGPA**: 9.45
SJB Institute of Technology, Bengaluru — **B.E**, Computer Science & Engineering (2021 – 2025) | **CGPA**: 9.17

PUBLICATION

- [Land Registry using Blockchain](#) — Published in **CIACON 2025 Conference, IEEE**

EXPERIENCE

1. [Defence Research and Development Organisation \(DRDO\), Bengaluru](#) - Intern **Feb 2025 - May 2025**
Designed and implemented algorithms to classify flying objects (missile, satellite, aircraft, unknown) using Belief Theory (Transferable Belief Model). Worked extensively on radar trajectory data processing, trajectory modeling, feature extraction, and uncertainty handling using MATLAB and Python. Improved classification robustness through belief mass function modeling and force-based trajectory analysis.
2. [Bharat Electronic Limited \(BEL\), Bengaluru](#) - Intern **Oct 2023 - Nov 2023**
Applied machine learning techniques to solve leaf disease detection, working on data preprocessing, model development, and evaluation pipelines. Gained hands-on exposure to software development workflows in an R&D environment, strengthening analytical thinking, problem-solving, and collaborative development skills.

PROJECTS

1. **Leaf Disease Detection**
 - Role:** Developed and trained a deep learning-based CNN model to identify 32 types of leaf diseases.
 - Achievements:** Achieved 92% classification accuracy, enabling early disease detection and crop management.
 - Tech Stack:** Python, TensorFlow, Keras, Matplotlib.
2. **Target Classification using Belief Theory**
 - Role:** Designed a radar-based object classification system using Transferable Belief Model (TBM).
 - Achievements:** Implemented belief mass functions, trajectory analysis, and force modeling to handle uncertainty.
 - Tech Stack:** MATLAB, Python.
3. **Car Hub – Online Car Rental Platform**
 - Role:** Designed and developed a full-stack car rental platform with backend REST APIs and interactive frontend.
 - Achievements:** Implemented secure authentication, role-based access, real-time booking workflows, vehicle availability tracking, and admin dashboard, significantly reducing manual operations and improving system usability.
 - Tech Stack:** Flask, React.js, Next.js, Python, REST APIs, MongoDB.

TECHNICAL SKILLS:

1. **Languages:** Python, Java, C
2. **Web & Frameworks:** Django, Flask, React.js, Next.js
3. **Databases:** MySQL, MongoDB
4. **Tools:** MATLAB, Jupyter Notebook, Eclipse, Git
5. **Other:** Prompt Engineer, Cloud Computing, Block-Chain.

CERTIFICATIONS & ACHIEVEMENTS

[Cloud Computing Foundations](#) Google , [AI A-Z](#) Udemy, [C Program](#) BALC
[Tabala Jr.](#) Hindustani Talavadya Junior Grade

SOFT SKILLS

Problem Solving • Analytical Thinking • Teamwork • Communication • Leadership • Adaptability • Strong Work Ethic
